The National Youth Jazz Collective is the country's biggest network for teaching young musicians to play and improvise in small bands.

We help you learn how to:

- Recognise the chords and structures in music you enjoy
- Play melodies and improvise solos by ear (no dots involved!)
- Recognise and play new grooves, hooks and riffs
- Discover the most popular rhythms used in jazz, funk, pop and rock bands
- Know how to play your instrument so that it sounds best with others
- Enjoy writing and playing new musical ideas
- Build confidence and perform as an improvising musician

Train with top tutors who are all professional composers and performing jazz musicians using the NYJC teaching method where you learn by playing.

ALL instruments welcome (not just Western or jazz)
Singers welcome

"I probably wouldn't be anywhere near what I'm doing today without what I've got from NYJC. It's the best tuition you can get"
